

To program your i-Bot using the copy and paste flash programmer

Step 1> Launch the “**Online Copy & Paste Programming Software**”, and write your program.

Step 2> Click on “**Program**”

Step 3> Highlight all of the ones and zeros with your mouse cursor. Once all of the zeros and ones are highlighted, right click on the highlighted area and select “**COPY**”

Step 4> Launch the “**i-Bot encoder**” program.

Step 5> In the “**i-Bot encoder**” program, right click in the middle of the white box on the right hand side of the screen and select “**PASTE**”, the zeros and ones from the “**Online Copy & Paste Programming Software**” should now appear in the box.

Step 6> Scan the **READ SCREEN** barcode

Step 7> Hold i-bots line tracker over the white square on the left hand side of the “**i-Bot encoder**” software on the screen

Step 8> Press and release the button on the rear of the i-bot, the LED will come on

Step 9> Once the red LED on the line tracker has turned off, press “**DOWNLOAD**” on the “**i-bot encoder**” software. This will begin the flashing process, Keep the i-bot completely still during this process. The i-bot will make a confirmation chirp when the program has downloaded successfully.

Step 10> Scan the **EXECUTE i2L PROGRAM** barcode and press i-bots rear button to start your program.
